Neural Network Programming with Python

Fabio. M. Soares, Rodrigo Nunes

Neural Network Programming with Python Fabio. M. Soares, Rodrigo Nunes

Key Features

- Make your roots stronger in neural networks by this concept-rich yet highly practical guide; from single layer to multiple layers with the help of Python
- Through this book, you will develop a strong background in neural networks, regardless of your level of previous knowledge in this subject
- You will be able to implement solutions from scratch, so the whole process on foundations of neural network solution design will be paced by you

Book Description

If you wish to solve your complex computational problem efficiently, neural networks come to the rescue. This book will teach you how to ace neural networks and solve your computational problems with Python—right from predicting to self-learning models—with ease. We start off with neural network design, then you'll build a solid foundational knowledge of how a neural network learns from data, and the principles behind it.

This book cover various types of neural networks including recurrent neural networks and convoluted neural networks. You will not only learn how to train neural networks, but also see a generalization of these networks. With the help of practical examples and real-world use cases, you will learn to implement these neural networks in your applications.

What you will learn

- See the latest innovations in the field
- Become fluent in Python to develop neural networks solutions capable of solving complex and interesting tasks
- Implement neural networks step-by-step
- Solve your complex computational problems with the aid of neural networks and Python
- The reader will be able to set up his/her neural network with ease, according to the objective he/she wants to apply.
- The reader will be able to design time series based models using RNNs in Python.
- Will be able to design high level solutions with CNNs in Python

---

From reader reviews:

Jean Smith:

As people who live in often the modest era should be revise about what going on or facts even knowledge to make these individuals keep up with the era which is always change and move forward. Some of you maybe can update themselves by studying books. It is a good choice for yourself but the problems coming to anyone is you don't know what one you should start with. This Neural Network Programming with Python is our recommendation to cause you to keep up with the world. Why, because book serves what you want and want in this era.

Carl Strum:

Do you certainly one of people who can't read pleasurable if the sentence chained from the straightway, hold on guys that aren't like that. This Neural Network Programming with Python book is readable simply by you who hate the straight word style. You will find the data here are arrange for enjoyable reading through experience without leaving also decrease the knowledge that want to deliver to you. The writer connected with Neural Network Programming with Python content conveys the idea easily to understand by many people. The printed and e-book are not different in the written content but it just different as it. So , do you nonetheless thinking Neural Network Programming with Python is not loveable to be your top list reading book?

Joseph Benoit:

Does one one of the book lovers? If so, do you ever feeling doubt when you are in the book store? Aim to pick one book that you just dont know the inside because don't determine book by its include may doesn't work is difficult job because you are afraid that the inside maybe not seeing that fantastic as in the outside appearance likes. Maybe you answer might be Neural Network Programming with Python why because the fantastic cover that make you consider concerning the content will not disappoint anyone. The inside or content will be fantastic as the outside or perhaps cover. Your reading sixth sense will directly guide you to pick up this book.

Carolyn Alcantara:

Are you kind of stressful person, only have 10 or even 15 minute in your day to upgrading your mind expertise or thinking skill even analytical thinking? Then you are receiving problem with the book when compared with can satisfy your small amount of time to read it because all this time you only find e-book that need more time to be learn. Neural Network Programming with Python can be your answer as it can be read by a person who have those short free time problems.
