## Genomic Imprinting (Cytogenetic and Genomic Research)

Reprint of: Cytogenetic and Genome Research 2006, Vol. 113, No. 1-4 Genomic imprinting, a parent-of-origin-specific epigenetic modification of the genome, is observed in placental mammals and some plants (angiosperms). Since its discovery in the early 1980s, this intriguing phenomenon has been intensively investigated and has spawned an exciting new research area. Imprinting is relevant to a variety of biological events such as embryogenesis, growth and behavior, and its disruption can lead to congenital malformation syndromes and cancers. Furthermore, imprinting has been serving as an excellent model system to study epigenetic mechanisms of gene regulation and helping us to understand how gene clusters and genome domains are regulated. This special issue provides an overview of the current knowledge of genomic imprinting. Including both excellent reviews and original research articles by outstanding researchers in the field, many of which were participants of the genomic imprinting workshops in Montpellier (September 2004) and Oxford (April 2005), it represents the forefront of imprinting research.

### From reader reviews:

#### **William Perez:**

As people who live in typically the modest era should be update about what going on or facts even knowledge to make these individuals keep up with the era that is always change and progress. Some of you maybe will probably update themselves by studying books. It is a good choice in your case but the problems coming to an individual is you don't know which you should start with. This Genomic Imprinting (Cytogenetic and Genomic Research) is our recommendation to make you keep up with the world. Why, since this book serves what you want and want in this era.

#### **Lisa Gonzales:**

Spent a free time to be fun activity to do! A lot of people spent their free time with their family, or their particular friends. Usually they carrying out activity like watching television, going to beach, or picnic inside park. They actually doing ditto every week. Do you feel it? Will you something different to fill your current free time/ holiday? Might be reading a book may be option to fill your cost-free time/ holiday. The first thing you ask may be what kinds of publication that you should read. If you want to try out look for book, may be the book untitled Genomic Imprinting (Cytogenetic and Genomic Research) can be very good book to read. May be it could be best activity to you.

#### **Gwendolyn Smith:**

Do you have something that you enjoy such as book? The publication lovers usually prefer to choose book like comic, small story and the biggest you are novel. Now, why not hoping Genomic Imprinting (Cytogenetic and Genomic Research) that give your satisfaction preference will be satisfied by simply reading this book. Reading behavior all over the world can be said as the means for people to know world far better then how they react towards the world. It can't be said constantly that reading practice only for the geeky particular person but for all of you who wants to become success person. So , for all of you who want to start examining as your good habit, you are able to pick Genomic Imprinting (Cytogenetic and Genomic Research) become your current starter.

#### **Nancy Williams:**

What is your hobby? Have you heard in which question when you got college students? We believe that that issue was given by teacher with their students. Many kinds of hobby, All people has different hobby. Therefore you know that little person including reading or as reading through become their hobby. You must know that reading is very important and book as to be the thing. Book is important thing to increase you knowledge, except your own personal teacher or lecturer. You get good news or update with regards to something by book. Different categories of books that can you choose to use be your object. One of them is niagra Genomic Imprinting (Cytogenetic and Genomic Research).
