Stefano Atzeni, Jürgen Meyer-ter-Vehn

The Physics of Inertial Fusion: Beam Plasma Interaction, Hydrodynamics, Hot Dense Matter (International Series of Monographs on Physics) Stefano Atzeni, Jürgen Meyer-ter-Vehn

This book is on inertial confinement fusion, an alternative way to produce electrical power from hydrogen fuel by using powerful lasers or particle beams. Two huge laser facilities are presently under construction to show that this method works. It involves the compression of tiny amounts (micrograms) of fuel to thousand times solid density and pressures otherwise existing only in the centre of stars. Thanks to advances in laser technology, it is now possible to produce such extreme states of matter in the laboratory. Recent developments have boosted laser intensities again with new possibilities for laser particle accelerators, laser nuclear physics, and fast ignition of fusion targets. This is a reference book for those working on beam plasma physics, be it in the context of fundamental research or applications to fusion energy or novel ultra-bright laser sources. The book combines quite different areas of physics: beam target interaction, dense plasmas, hydrodynamic implosion and instabilities, radiative energy transfer as well as fusion reactions. Particular attention is given to simple and useful modeling, including dimensional analysis and similarity solutions. Both authors have worked in this field for more than 20 years. They want to address in particular those teaching this topic to students and all those interested in understanding the technical basis.

From reader reviews:

Kyle Raya:

Hey guys, do you wish to find a new book to learn? Maybe the book with the subject The Physics of Inertial Fusion: Beam Plasma Interaction, Hydrodynamics, Hot Dense Matter (International Series of Monographs on Physics) suitable to you? The actual book was written by well-known writer in this era. The particular book entitled The Physics of Inertial Fusion: Beam Plasma Interaction, Hydrodynamics, Hot Dense Matter (International Series of Monographs on Physics) is one of several books in which everyone reads now. This book has inspired lots of people in the world. When you read this book you will enter the new way of measuring that you never knew ahead of. The author explained their strategy in the simple way, thus all of people can easily recognize the core of this publication. This book will give you a lot of information about this world now. So you can see the representation of the world in this particular book.

Joey Leigh:

Reading a book can be one of a lot of activities that everyone in the world really likes. Do you like reading books thus? There are a lot of reasons why people enjoy. First, reading a book will give you a lot of new info. When you read a publication you will get new information because a book is one of various ways to share the information or perhaps their idea. Second, reading a book will make a person more imaginative. When you look at a book especially a fictional book the author will bring someone to imagine the story how the character types do anything. Third, it is possible to share your knowledge to others. When you read this The Physics of Inertial Fusion: Beam Plasma Interaction, Hydrodynamics, Hot Dense Matter (International Series of Monographs on Physics), you may tell your family, friends along with soon about your book. Your knowledge can inspire others, make them read a book.

Jane Hanscom:

Are you kind of a hectic person, only have 10 as well as 15 minutes in your day time to upgrade your mind ability or thinking skill actually analytical thinking? Then you are having a problem with the book as compared to can't satisfy your limited time to read it because pretty much everything you only find e-books that need more time to be read. The Physics of Inertial Fusion: Beam Plasma Interaction, Hydrodynamics, Hot Dense Matter (International Series of Monographs on Physics) can be your answer as it can be read by you who have those short spare time problems.

William Reyes:

Is it an individual who has spare time after that spends it whole day simply by watching television programs or just resting on the bed? Do you need something new? This The Physics of Inertial Fusion: Beam Plasma Interaction, Hydrodynamics, Hot Dense Matter (International Series of Monographs on Physics) can be the solution, oh how comes? The new book you know. You are therefore out of date, spending your free

time by reading in this brand new era is common not a nerd activity. So what these publications have than the others?
