Describing and Recognizing 3-D Objects Using Surface Properties (Springer Series in Perception Engineering) Ting-Jun Fan

Surface properties play a very important role in many perception tasks. Object recognition, navigation, and inspection use surface properties extensively. Characterizing surfaces at different scales in given data is often the first and possibly the most important step. Most early research in machine perception relied on only very coarse characterization of surfaces. In the last few years, surface characterization has been receiving due attention. Dr. T. J. Fan is one of the very few researchers who designed and implemented a complete system for object recognition. He studied issues related to characterization of surfaces in the context of object recognition, and then uses the features thus developed for recognizing objects. He uses a multi-view representation of 3-D objects for recognition, and he develops techniques for the segmentation of range images to obtain features for recognition. His matching approach also allows him to recognize objects from their partial views in the presence of other occluding objects. The efficacy of his approach is demonstrated in many examples.

From reader reviews:

Cindy Grant:

The book Describing and Recognizing 3-D Objects Using Surface Properties (Springer Series in Perception Engineering) can give more knowledge and information about everything you want. Why must we leave the good thing like a book Describing and Recognizing 3-D Objects Using Surface Properties (Springer Series in Perception Engineering)? Some of you have a different opinion about book. But one aim that book can give many facts for us. It is absolutely appropriate. Right now, try to closer with the book. Knowledge or info that you take for that, you could give for each other; you may share all of these. Book Describing and Recognizing 3-D Objects Using Surface Properties (Springer Series in Perception Engineering) has simple shape however, you know: it has great and large function for you. You can look the enormous world by open up and read a reserve. So it is very wonderful.

Jim Weigel:

The reserve untitled Describing and Recognizing 3-D Objects Using Surface Properties (Springer Series in Perception Engineering) is the book that recommended to you to see. You can see the quality of the reserve content that will be shown to anyone. The language that publisher use to explained their ideas are easily to understand. The article writer was did a lot of investigation when write the book, and so the information that they share to you personally is absolutely accurate. You also could get the e-book of Describing and Recognizing 3-D Objects Using Surface Properties (Springer Series in Perception Engineering) from the publisher to make you a lot more enjoy free time.

Kevin Serna:

Why? Because this Describing and Recognizing 3-D Objects Using Surface Properties (Springer Series in Perception Engineering) is an unordinary book that the inside of the reserve waiting for you to snap the idea but latter it will surprise you with the secret this inside. Reading this book beside it was fantastic author who write the book in such incredible way makes the content inside easier to understand, entertaining method but still convey the meaning completely. So , it is good for you because of not hesitating having this anymore or you going to regret it. This phenomenal book will give you a lot of rewards than the other book possess such as help improving your skill and your critical thinking means. So , still want to hesitate having that book? If I ended up you I will go to the reserve store hurriedly.

Richard Bennett:

Guide is one of source of knowledge. We can add our expertise from it. Not only for students but in addition native or citizen require book to know the up-date information of year to be able to year. As we know those ebooks have many advantages. Beside most of us add our knowledge, may also bring us to around the world. Through the book Describing and Recognizing 3-D Objects Using Surface Properties (Springer Series in Perception Engineering) we can take more advantage. Don't one to be creative people? To get creative

person must choose to read a book. Just simply choose the best book that acceptable with your aim. Don't always be doubt to change your life with that book Describing and Recognizing 3-D Objects Using Surface Properties (Springer Series in Perception Engineering). You can more desirable than now.
