## **Esferas II (Biblioteca de Ensayo / Serie mayor) (Spanish Edition)** Peter Sloterdijk

Si el primer volumen de la trilogía Esferas, titulado Burbujas, trata de las microsferas –de que el individuo desde el estadio de feto hasta la niñez nunca está solo, sino que siempre incluye al otro y se orienta de acuerdo con él–, con el segundo volumen de Esferas, titulado Globos, se recorre una historia del mundo político basada en las imágenes rectoras morfológicas de la esfera y del globo. Peter Sloterdijk muestra que todas las manifestaciones con respecto a la globalización están aquejadas hasta ahora de miopía. Para él, la globalización comienza con los griegos, quienes ya representaron el universo mediante la imagen de la esfera. Ésta también se encuentra en la base de las representaciones de orden de los imperios premodernos. Con el descubrimiento de América y las primeras circunvoluciones terrestres, aparece en su lugar el globo. Esta segunda globalización es sustituida por una tercera, dado que la virtualidad general de todas las relaciones conduce a una crisis de espacio. El autor narra, así, la verdadera historia de la globalización: desde la geometrización del cielo en Platón y Aristóteles hasta la circunvolución de la última esfera, la tierra, por barcos, capitales y señales. Peter Sloterdijk emprende aquí, por tanto, la tarea de poner al descubierto los fundamentos filosóficos de la historia política de los últimos dos milenios y medio.
