Complexity: Metaphors, Models, and Reality

George A. Cowan, David Pines, David Meltzer

Complexity: Metaphors, Models, and Reality George A. Cowan, David Pines, David Meltzer

The terms complexity, complex adaptive systems, and sciences of complexity are found often in recent scientific literature, reflecting the remarkable growth in collaborative academic research focused on complexity from the origin and dynamics of organisms to the largest social and political organizations. One of the great challenges in this field of research is to discover which features are essential and shared by all of the seemingly disparate systems that are described as complex. Is there sufficient synthesis to suggest the possibility of an overarching science of complexity? This report describes current views on this subject held by various eminent scholars associated with the Santa Fe Institute. The physical sciences have traditionally been concerned with “simple” systems whose dynamics can be described in mathematical terms with precision and certainty. In contrast, the biological and social sciences are inevitably concerned with self-organized or social “complex” systems whose detailed behaviors appear to be unpredictable. The two categories differ greatly in size and diversity, prompting the late mathematician Stanislaus Ulam to remark that research on complex systems might be compared to the study of non-elephants. Nevertheless, certain integrative themes have begun to emerge. Rising activity in this field of research runs completely counter to the trend toward increasing fragmentation and specialization in the sciences. It has stimulated a resurgence of interest in a broad synthesis involving mathematics, computational science, physics, chemistry, biology, neuroscience, and the social sciences. The growth of effort in this very extended field has been greatly stimulated by the development of new computational tools that are capable of dealing with vast, interrelated databases. Many of the participants in complexity research feel that it is now time to reintegrate the fragmented interests of much of the academic community. The reader is encouraged to consider whether such views are sparking a historic renaissance of scholarship or represent a passing scientific diversion.

From reader reviews:

Victoria Williams:

Information is provisions for folks to get better life, information nowadays can get by anyone at everywhere. The information can be a information or any news even a concern. What people must be consider if those information which is in the former life are difficult to be find than now is taking seriously which one would work to believe or which one typically the resource are convinced. If you get the unstable resource then you get it as your main information we will see huge disadvantage for you. All those possibilities will not happen inside you if you take Complexity: Metaphors, Models, and Reality as the daily resource information.

Elsie Port:

Would you one of the book lovers? If yes, do you ever feeling doubt if you find yourself in the book store? Try and pick one book that you just dont know the inside because don't determine book by its deal with may doesn't work is difficult job because you are scared that the inside maybe not while fantastic as in the outside search likes. Maybe you answer could be Complexity: Metaphors, Models, and Reality why because the great cover that make you consider in regards to the content will not disappoint you actually. The inside or content is fantastic as the outside as well as cover. Your reading 6th sense will directly guide you to pick up this book.

Jon Pittenger:

Beside that Complexity: Metaphors, Models, and Reality in your phone, it could give you a way to get closer to the new knowledge or details. The information and the knowledge you may got here is fresh from your oven so don't always be worry if you feel like an aged people live in narrow commune. It is good thing to have Complexity: Metaphors, Models, and Reality because this book offers for you readable information. Do you occasionally have book but you seldom get what it's facts concerning. Oh come on, that wil happen if you have this with your hand. The Enjoyable agreement here cannot be questionable, such as treasuring beautiful island. Use you still want to miss this? Find this book and also read it from at this point!

Mary Wines:

A lot of people said that they feel weary when they reading a reserve. They are directly felt it when they get a half elements of the book. You can choose the actual book Complexity: Metaphors, Models, and Reality to make your own reading is interesting. Your current skill of reading talent is developing when you including reading. Try to choose straightforward book to make you enjoy you just read it and mingle the sensation about book and studying especially. It is to be initial opinion for you to like to available a book and go through it. Beside that the book Complexity: Metaphors, Models, and Reality can to be your brand-new friend when you're feel alone and confuse in doing what must you're doing of these time.
