Curtain Wall Systems: A Primer (Asce Manual and Reports on Engineering Practice) Ph.D., P.E. Ali M. Memari

Curtain Wall Systems compiles a basic review of the many aspects of curtain wall systems that affect their design and performance. It highlights the materials used to manufacture curtain walls for low-rise to high-rise construction and describes different types of tests, mockups, and inspections. Methods of improving the energy performance, waterproofing, and wind loading of curtain walls are assessed. Specialized aspects of curtain wall design and analysis for extreme events, such as earthquake and bomb blast, are explored. Innovative façade design and new curtain wall and glazing systems are covered as well. MOP 126 is written for architects, structural engineers, HVAC engineers, general contractors, building owners, and building operators who are new to curtain wall systems and want to learn more about this specialized and emerging field.
