God's Master Plan: Creation or Evolution?

Robert D. Howie

God's Master Plan: Creation or Evolution? Robert D. Howie

The long history of conflicting thought between theoretical beliefs and those delineated via biblical interpretation are explored in depth in Robert D. Howie's insightful book, *God's Master Plan: Creation or Evolution?* In it, Mr. Howie examines a multitude of questions on both sides of the controversy, with the intent to show that "there really is no conflict between true science and a correct interpretation of the scriptures." Drawing heavily from the King James Version as well as many scientific works, the author makes easy reading and understanding out of what, for the average reader, would be difficult to comprehend. And, in his desire not to offend, he gives pinpoint credence to answers found within the frameworks of archaeology, geology and biology while effectively balancing the relevant sources within the Bible. ROBERT D. HOWIE has done extensive biblical and scientific research over the years in preparation for this book. A retired geologist, the author has traveled the world for work and for pleasure, recently celebrating forty years of marriage with his wife, Marion, on an extended vacation. With three grown children, Mr. Howie's retirement also includes golf, painting in oils and photography. He was born and raised, and continues to reside, in Canada.
