## **Seismic Interpretation of Contractional Fault-Related Folds: An AAPG Seismic Atlas (AAPG Studies in Geology)** John H. Shaw

This AAPG Seismic Atlas serves as an instructional guide and resource for the interpretation of complex structures imaged in seismic reflection profiles using quantitative fault-related folding theories. The emphasis is on contractional fault-related folds, including fault-bend folds, fault-propagation folds, detachment folds, shear fault-bend folds, imbricate thrust systems, and structural wedges. These types of structures form the majority of the large hydrocarbon traps in both orogenic and passive-margin fold and thrust belts worldwide.

The Atlas is divided into two complimentary parts. The first section illustrates the application of fault-related folding theories to many well-imaged seismic examples by way of step-by-step interpretations and ubiquitous models. A compilation of 25 case studies from petroleum basins around the world comprises the second section of the Atlas.

The volume is intended to assist E&P professionals involved in seismic interpretation for the purposes of trap delineation and reservoir characterization, to aid those who evaluate structural interpretations in order to assign and reduce drilling risks, and to serve as a manual for anyone interested in applying the theories of fault-related folding to seismic interpretation.

American Association of Petroleum Geologists (AAPG)

Founded in 1917, AAPG is the world's largest professional geological society.

AAPG is a pillar of the world-wide scientific community. Our books foster timely scientific research, advance the science of geology and promote the most efficient methods of energy exploration & processing technology and practices available today.

Some of the areas we publish in include:

Well Log Analysis

Geological Modeling

Carbonate Petrology

Seismic Imaging

Reservoir Characterization

Regional Petroleum Analysis

Tectonics and Sedimentation

Stratigraphy

### **From reader reviews:**

#### **Alysa Appel:**

In this 21st one hundred year, people become competitive in every way. By being competitive at this point, people have to do something to make them survive, being in the middle of often the crowded place and notice simply by surrounding. One thing that sometimes many people have underestimated the idea for a while is reading. Yes, by reading a publication your ability to survive increases then having a chance to stay than other is high. In your case who want to start reading any book, we give you this Seismic Interpretation of Contractional Fault-Related Folds: An AAPG Seismic Atlas (AAPG Studies in Geology) book as nice and daily reading e-book. Why, because this book is usually more than just a book.

#### **Maria Gray:**

As people who live in the actual modern era should be revise about what going on or details even knowledge to make these individuals keep up with the era that is always change and move forward. Some of you maybe will update themselves by examining books. It is a good choice to suit your needs but the problems coming to you is you don't know which you should start with. This Seismic Interpretation of Contractional Fault-Related Folds: An AAPG Seismic Atlas (AAPG Studies in Geology) is our recommendation to make you keep up with the world. Why, because book serves what you want and wish in this era.

#### **Henry Stanton:**

Information is provisions for folks to get better life, information currently can get by anyone at everywhere. The information can be a knowledge or any news even a huge concern. What people must be consider whenever those information which is inside the former life are hard to be find than now's taking seriously which one is acceptable to believe or which one the resource are convinced. If you have the unstable resource then you obtain it as your main information we will see huge disadvantage for you. All of those possibilities will not happen throughout you if you take Seismic Interpretation of Contractional Fault-Related Folds: An AAPG Seismic Atlas (AAPG Studies in Geology) as the daily resource information.

#### **Robert Jones:**

That book can make you to feel relax. This particular book Seismic Interpretation of Contractional Fault-Related Folds: An AAPG Seismic Atlas (AAPG Studies in Geology) was colorful and of course has pictures on the website. As we know that book Seismic Interpretation of Contractional Fault-Related Folds: An AAPG Seismic Atlas (AAPG Studies in Geology) has many kinds or genre. Start from kids until teens. For example Naruto or Detective Conan you can read and feel that you are the character on there. Therefore, not at all of book are usually make you bored, any it offers up you feel happy, fun and chill out. Try to choose the best book in your case and try to like reading in which.
