Discussions of the Committee on Daubert Standards: Summary of Meetings Committee on Daubert Standards, Committee on Science Technology and Law, National Research Council

In 1993, the U.S. Supreme Court in *Daubert v. Merrell Dow Pharmaceuticals, Inc.*, laid out a new test for federal trial judges to use when determining the admissibility of expert testimony. In *Daubert*, the Court ruled that judges should act as gatekeepers, assessing the reliability of the scientific methodology and reasoning that supports expert testimony. The resulting judicial screening of expert testimony has been particularly consequential. While the Supreme Court sought to bring better science into the courtroom, questions remain about whether the lower courts' application of *Daubert* accords with scientific practices. This report summarizes discussions held by an ad hoc committee of the The National Academies to consider the impact of *Daubert* and subsequent Supreme Court opinions and to identify questions for future study.
