Pipeline Protection

Pipeline Protection

The condition of the pipeline is critical to its continued safe, efficient, and environmentally friendly operation. One of the biggest challenges facing oil, gas, and process industry today is how to maintain the safety and economical operation of the pipelines beyond their original design life. For new pipelines, employing the latest techniques helps to optimise the installation for economic performance and extended working life. There have been tremendous advances in the techniques and materials available in recent years, but there is still demand for more information on the latest developments. This work gathers together the latest information on all aspects of pipeline protection. Presenting studies on the costs and benefits of the latest pipe materials, coating, jointing techniques, inhibitors, and monitoring and cleaning systems, this volume presents vital information which technical staff need to understand in order to achieve maximum benefit from the most up-to-date knowledge. This volume should be of interest to pipeline operators, contractors, coating manufacturers and developers, designers and researchers associated with the oil and gas, chemical, and water industries.
