The Antigens: Volume VI

The Antigens: Volume VI

The Antigens, Volume VI is a comprehensive treatise covering all aspects of antigens, including their chemistry and biology as well as their immunologic role and expression. Parasite antigens and their immunogenicity in infected hosts are explored, along with the nature of the antibody-combining site and the phenomenon of immunological tolerance.

Comprised of three chapters, this volume begins with a discussion on the dynamic aspects of the function of antibodies, paying particular attention to the structure of immunoglobulins and the folding of their domains; the dynamics of segmental flexibility; the kinetics of antibody-hapten association and the kinetic expression of elementary interaction; and the conformational transitions within the antibody molecule induced by hapten binding. The next chapter focuses on the immunogenicity of parasite antigens in infected hosts, citing such parasites as trypanosomes, *Schistosoma mansoni*, and *Fasciola hepatica*. The last chapter deals with immunological tolerance, its induction and duration, and its effect on the specificity of the immune response.

This monograph will be of interest to practitioners and researchers in immunology, experimental and clinical medicine, biochemistry, and other disciplines.

From reader reviews:

Elizabeth Frizzell:

As people who live in typically the modest era should be change about what going on or info even knowledge to make them keep up with the era that is certainly always change and progress. Some of you maybe may update themselves by studying books. It is a good choice in your case but the problems coming to you actually is you don't know which one you should start with. This The Antigens: Volume VI is our recommendation to help you keep up with the world. Why, as this book serves what you want and want in this era.

Linda Fite:

Playing with family in a very park, coming to see the water world or hanging out with close friends is thing that usually you might have done when you have spare time, then why you don't try issue that really opposite from that. One particular activity that make you not feeling tired but still relaxing, trilling like on roller coaster you already been ride on and with addition of knowledge. Even you love The Antigens: Volume VI, you are able to enjoy both. It is excellent combination right, you still want to miss it? What kind of hang-out type is it? Oh can occur its mind hangout folks. What? Still don't understand it, oh come on its identified as reading friends.

Julie Chambers:

That book can make you to feel relax. This particular book The Antigens: Volume VI was multi-colored and of course has pictures on there. As we know that book The Antigens: Volume VI has many kinds or type. Start from kids until young adults. For example Naruto or Private eye Conan you can read and think that you are the character on there. Therefore not at all of book are make you bored, any it offers up you feel happy, fun and loosen up. Try to choose the best book for you personally and try to like reading this.

June Slater:

As a pupil exactly feel bored to help reading. If their teacher requested them to go to the library in order to make summary for some reserve, they are complained. Just minor students that has reading's heart and soul or real their leisure activity. They just do what the professor want, like asked to the library. They go to generally there but nothing reading very seriously. Any students feel that studying is not important, boring in addition to can't see colorful pictures on there. Yeah, it is to become complicated. Book is very important in your case. As we know that on this period, many ways to get whatever we wish. Likewise word says, many ways to reach Chinese's country. Therefore this The Antigens: Volume VI can make you experience more interested to read.
