*Enterprise Health Information Management and Data Governance* provides the fundamentals, principles, and practices for managing the data asset.

Data growth rates are increasing at a phenomenal pace for most businesses. *Enterprise Health Information Management and Data Governance* tackles how healthcare organizations can manage their data in this era of dramatic data explosion and growing deployment of information technologies.

Healthcare organizations must understand that their sustainability and future viability relies on the quality of their data and how they manage this resource on an enterprise-wide basis. This text provides a framework and logical structure to help students understand the components of health information management in a digital era and to provide them with opportunities to develop the necessary skills for performing functions associated with these components.

Provides an outline of enterprise-wide information management (EIM) for healthcare

Each chapter incorporates a case study, providing a real-world perspective to student learning and exploring the concepts and interrelationships of EIM and data governance

Students are invited to be a part of the case study through a set of activities at the end of each chapter

Advanced concepts are provided at the end of each chapter for in-depth analysis and study

Aligns with AHIMA core competencies
