Identification of Defects in Semiconductors, Volume 51B (Semiconductors and Semimetals) (Vol 51B)

Identification of Defects in Semiconductors, Volume 51B (Semiconductors and Semimetals) (Vol 51B)

GENERAL DESCRIPTION OF THE SERIES

Since its inception in 1966, the series of numbered volumes known as **Semiconductors and Semimetals** has distinguished itself through the careful selection of well-known authors, editors, and contributors. The "Willardson and Beer" Series, as it is widely known, has succeeded in publishing numerous landmark volumes and chapters. Not only did many of these volumes make an impact at the time of their publication, but they continue to be well-cited years after their original release. Recently, Professor Eicke R. Weber of the University of California at Berkeley joined as a co-editor of the series. Professor Weber, a well-known expert in the field of semiconductor materials, will further contribute to continuing the series' tradition of publishing timely, highly relevant, and long-impacting volumes. Some of the recent volumes, such as **Hydrogen in Semiconductors, Imperfections in III/V Materials, Epitaxial Microstructures, High-Speed Heterostructure Devices, Oxygen in Silicon**, and others promise indeed that this tradition will be maintained and even expanded.

Reflecting the truly interdisciplinary nature of the field that the series covers, the volumes in **Semiconductors and Semimetals** have been and will continue to be of great interest to physicists, chemists, materials scientists, and device engineers in modern industry.

GENERAL DESCRIPTION OF THE VOLUME

This volume has contributions on Advanced Characterization Techniques with a focus on defect identification. The combination of beam techniques with electrical and optical characterization has not been discussed elsewhere.

From reader reviews:

Diana Ham:

This book titled Identification of Defects in Semiconductors, Volume 51B (Semiconductors and Semimetals) (Vol 51B) to be one of several books that will best seller in this year, this is because when you read this guide you can get a lot of benefit into it. You will easily to buy this kind of book in the book store or you can order it by means of online. The publisher of the book sells the e-book too. It makes you more readily to read this book, since you can read this book in your Cell phone. So there is no reason for you to past this publication from your list.

Mitchell Diaz:

A lot of people always spent their very own free time to vacation or maybe go to the outside with them loved ones or their friend. Do you realize? Many a lot of people spent these people free time just watching TV, or playing video games all day long. If you need to try to find a new activity that's look different you can read the book. It is really fun for you. If you enjoy the book that you read you can spent 24 hours a day to reading a guide. The book Identification of Defects in Semiconductors, Volume 51B (Semiconductors and Semimetals) (Vol 51B) it doesn't matter what good to read. There are a lot of people who recommended this book. We were holding enjoying reading this book. Should you did not have enough space to develop this book you can buy the actual e-book. You can m0ore easily to read this book from the smart phone. The price is not to cover but this book possesses high quality.

Juan Turgeon:

As we know that book is very important thing to add our information for everything. By a book we can know everything we would like. A book is a list of written, printed, illustrated or blank sheet. Every year seemed to be exactly added. This publication Identification of Defects in Semiconductors, Volume 51B (Semiconductors and Semimetals) (Vol 51B) was filled regarding science. Spend your extra time to add your knowledge about your scientific disciplines competence. Some people has different feel when they reading a new book. If you know how big benefit from a book, you can experience enjoy to read a reserve. In the modern era like at this point, many ways to get book which you wanted.

Wanda Riddle:

A lot of people said that they feel fed up when they reading a e-book. They are directly felt it when they get a half areas of the book. You can choose typically the book Identification of Defects in Semiconductors, Volume 51B (Semiconductors and Semimetals) (Vol 51B) to make your personal reading is interesting. Your personal skill of reading proficiency is developing when you just like reading. Try to choose basic book to make you enjoy to see it and mingle the opinion about book and reading especially. It is to be initially opinion for you to like to wide open a book and read it. Beside that the reserve Identification of Defects in Semiconductors, Volume 51B (Semiconductors and Semimetals) (Vol 51B) can to be your friend when

you're feel alone and confuse with what must you're doing of their time.
