The Legitimacy of the Middle Ages: On the Unwritten History of Theory (Post-Contemporary Interventions)

This collection of essays argues that any valid theory of the modern should—indeed must—reckon with the medieval. Offering a much-needed correction to theorists such as Hans Blumenberg, who in his *Legitimacy of the Modern Age* describes the “modern age” as a complete departure from the Middle Ages, these essays forcefully show that thinkers from Adorno to Žižek have repeatedly drawn from medieval sources to theorize modernity. To forget the medieval, or to discount its continued effect on contemporary thought, is to neglect the responsibilities of periodization.

In *The Legitimacy of the Middle Ages*, modernists and medievalists, as well as scholars specializing in eighteenth-, nineteenth-, and twentieth-century comparative literature, offer a new history of theory and philosophy through essays on secularization and periodization, Marx’s (medieval) theory of commodity fetishism, Heidegger’s scholasticism, and Adorno’s nominalist aesthetics. One essay illustrates the workings of medieval mysticism in the writing of Freud’s most famous patient, Daniel Paul Schreber, author of *Memoirs of My Nervous Illness* (1903). Another looks at Michael Hardt and Antonio Negri’s *Empire*, a theoretical synthesis whose conscientious medievalism was the subject of much polemic in the post-9/11 era, a time in which premodernity itself was perceived as a threat to western values. The collection concludes with an afterword by Fredric Jameson, a theorist of postmodernism who has engaged with the medieval throughout his career.
